

Use high performance **Hikariactor**

and start eco life with high comfortable living ?

We consultate your room for photocatalyst coating

Quick change from the room wall to air cleaner by light!!

If you try Photocatalyst

antibacteria

effective to
reduce dust

effective to
remove the pollen

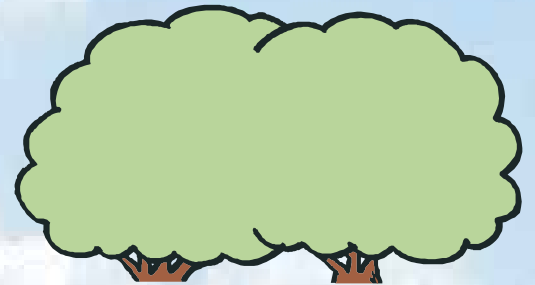

effective to
remove odor

prevent from
Sick home

It is very **eco**

because we don't need
to electric power
and filter replacement

[You can cort for those places]
**Wallpaper, ceiling, sofa,
curtain, carpet**

THEREFORE

It is very popular
medical institutions,
hotel guest room,
home, and office

What is photocatalyst

Photocatalyst is very effective by using light energy on photocatalyst itself. It is oxidative decomposition of various materials on the surface of photocatalyst.

The main component of the photocatalyst is also used in cosmetics and food additives and main compounds is titanium oxide.

Photocatalysts are listed in the Wikipedia and Yahoo dictionary. If you need to know more about photocatalyst, please check photocatalysis industry association website.

The photocatalyst is the latest technology by many researchers.

Hikariactor

is to improve the indoor environment

* Hikariactor is a registered trademark of Catarise corporation

Therefore, Catarise's photocatalyst coating is the best!

● Long-lasting effects with high-level

⇒ Accomplished high photocatalytic activity and adhesion by our own high technology

● Use photocatalyst for organic substances

⇒ Be able to coat for variety of interior materials and interior products

● Prevent degradation of the material

⇒ Ideal for hard materials such as curtains

● Speedy process

⇒ Quick process and less cost because of room temperature curable one-liquid

We use

Hikariactor G, H series, photocatalyst coating liquid for interior,

or

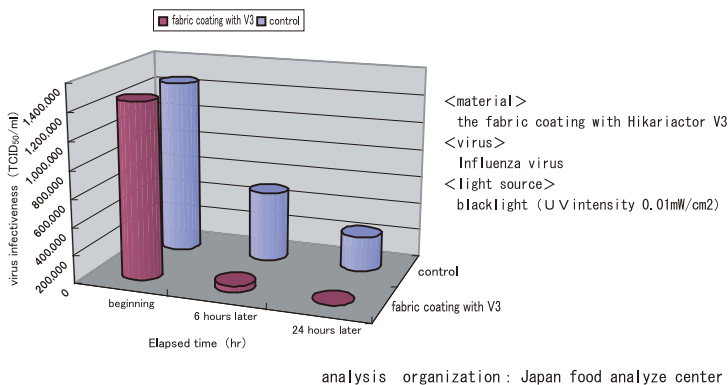

Hikariactor V series, high effective with weak light and **visible light.**

Catarise itself has developed and pressed those products.

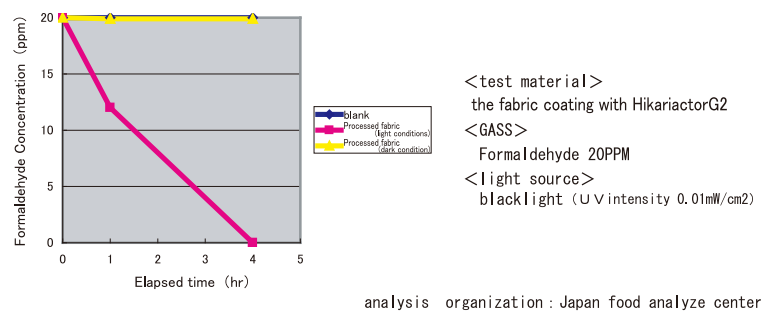

Demonstrating the high performance with Hikariactor

The test results by Hikariactor V3 Light Virus Inactivation

The result for formaldehyde eliminated by Hikariactor G2

Note: The resulting effect depends on the room light conditions and with hikariactors painted

Photocatalyst in your life
We support you to develop environment with peace and security.
